### TECHNICAL & CORE COMPETENCIES

**Systems Architecture:** Relational Database Design, Data Schema Modelling, CRM Optimisation, Process Mapping.

**Project Delivery:** Requirements Gathering, Technical Discovery, Stakeholder Alignment, Change Management.

**Implementation & Onboarding:** User Adoption Strategy, Technical Training, Documentation, Dashboard Reporting.

**Technical Stack:** Google Apps Script, Python, JavaScript (Basic), Advanced Excel/Sheets (Data Modelling, Arrays, Query functions), HubSpot (In Progress).

## PROFILE

Implementation-focused professional with experience designing and delivering systems that improve workflows, data visibility, and collaboration across organisations. Strong background in requirements gathering, workflow design, system configuration, and user adoption. Experienced in working with multiple stakeholders, translating needs into structured solutions, and supporting successful rollout through training and continuous improvement. Now seeking to apply these skills within a SaaS implementation or onboarding role.

## EXPERIENCE

### HEAD OF TECHNOLOGY AND STEAM+ COORDINATOR

Star International School, Dubai | 2025–Present

- Architected and deployed centralised internal data management systems across multiple departments, streamlining operational workflows for 10 cross-functional staff users.
- Gathered requirements from stakeholders and translated them into structured processes and systems.
- Configured and introduced tools within Google Workspace to improve collaboration and visibility across teams.
- Led user adoption and change management strategies, designing technical onboarding roadmaps and training sessions that secured 100% user adoption across the department.

### HEAD OF COMPUTING & STEAM COORDINATOR

British School of Malaga | 2022–2025

- Designed and implemented a system to track student progress, improving data visibility and reducing manual tracking for staff.
- Analysed existing workflows, identified inefficiencies, and introduced structured processes to improve consistency across departments.
- Worked closely with stakeholders to define requirements and align system outputs with user needs.
- Led user onboarding and training, ensuring effective adoption of new systems and tools.

### TEACHER / HEAD OF YEAR

Laude San Pedro International College | 2018–2022

- Designed and implemented a centralised Google Sites platform to improve access to resources and streamline internal workflows.
- Structured communication processes across staff, students, and parents, improving clarity and efficiency.
- Delivered training and ongoing support to users, increasing engagement with digital systems.
- Managed multiple responsibilities across academic and pastoral functions, maintaining organisation and consistency.

### TEACHER (MUSIC & TECHNOLOGY)

Churchdown Academy, Gloucester | 2016–2018

- Designed and implemented a digital recording studio, including workflows, system setup, and user training.
- Developed digital workflows for a Mac-based environment, improving usability and adoption.
- Coordinated events involving planning, logistics, and multiple stakeholders.

## LATEST PROJECT

### TECHNICAL PROJECT: CUSTOM CRM & AUTOMATED ETL PIPELINE (APPS SCRIPT)

**Architecture:** Designed and built a relational data-capture engine using low-code pipelines (Google Apps Script, REST-like hooks) to automate departmental performance tracking.

**Data Modelling:** Configured status pipelines, multi-conditional data validation, and real-time analytical reporting dashboards.

**Impact:** Eliminated manual data entry overhead across departments, establishing a centralized Single Source of Truth for organizational KPIs.

## EDUCATION

MIDDLE LEADERSHIP FOR LEARNING LEVEL PART 1 + 2 (MLLP 2)  
INTERNATIONAL SCHOOLS PARTNERSHIP

POST GRADUATE CERTIFICATE OF EDUCATION (PGCE)  
Bristol University (2015-2016)
